Health Clinic	£4000

*Hope is the only
thing stronger than fear.*

Fr Jack

With COP26 and the surrounding messages it could be a great time for prophets of doom... "The end is nigh." The end of many species and some countries and cultures will be wiped out. The ice cap will be gone, polar bears will probably have disappeared. And if we are lucky, that will be it.

In today's gospel, Jesus could see something similar happening; the beautiful temple of Jerusalem will be destroyed, "and not a stone will be left on another stone."

Jerusalem was being attacked from all sides. Jesus could see what was happening and "read the signs of the time." Many others also saw it, but never woke up, or did not like to admit it. Back to today, many people do not want to wake up, or do not want to admit what is happening. Are we being fair to future generations, to our children?

Jesus and I are not talking about the end of the world. We are talking about the end of many things we take for granted. Because Jesus said, "The angels, even the Son, does not know when these things will happen. Only God alone knows the day and the hour."

So, in case the reports from Scotland are too complicated, I give a few simple guidelines. But the end will come and we need to be prepared. So **don't waste, consider others, try to save, protect and appreciate** the wonderful world and facilities God has asked us to take care of. *And teach your children.*

November Dead List

There is a box at the back of church for your November dead list. All those you wish to pray for during this month, put their name in the box and they will be prayed for at all masses.
